Casper and Tianran: what I mean is if you
are leaving for China in mid June say
around June 14 we have enough time.
If you plan to leave in mid May this will not
work. Then you should find a different
faculty member to guide your internship.
Let me know ASAP because another
student is interested. I need only one
student to do experiments. Then I prefer
not to guide you two if you must leave in
May.

Then we can discuss the work

Is this the correct direction that we should be working towards? Also, is it possible to meet you at 4:15pm on Thursday instead because we have class during 2-3pm. Thanks!

Best,
Casper

further questions regarding research
opportunities

It will be great if two groups will
collaborate.
You should then develop two
components
such as GUI and trend analysis
and do the
testing.

As for meeting with me the best
time is
between 2pm and 3pm on
Thursday. If
you can make it this coming week
or
the following week please
confirm.

teams will choose Option 1 - GUI and Testing. We had to meet up and discuss about this today which is what took so long..for that we apologize for the late response. Also, regarding the research opportunities with you, me and Tianrun (also in the 1631 class) were hoping that we could meet with you during office hours or some other time that suits you best to discuss more about it and learn about the possible research projects during the summer semester!

Best,

Casper
